Secrets Of The
Movies Revealed

Q. How are close-ups made of people in a speeding auto?
A. If the actors are to be filmed in the front seat of a platform for the camera, and operator is built on the car directly in front of the radiator. If the passengers are in the rear seat the camera man works his machine from the front seat.

Q. What delay was made good as a director on her first attempt?
A. Lillian Gish, who directed her sister, Dorothy, in a five reel comedy. What delay was made? She was March 1st. Why has she been absent from pictures lately?

Q. The pathetic young girl roles of Mae Marsh gave her a reputation for originality. A baby girl, now eight months old, has monopolized all of her attention lately. She is now working on a new picture.

Q. What star, because of a dream, became an actress instead of a model?
A. Alla Nazimova. In her youth she studied the violin. A dream in which a ghostly hand took the violin away from her every time she attempted to play it, made her give up music for drama.

Q. How many churches in the U. S. are now showing motion pictures?
A. More than 2000 churches are now showing motion pictures in this country.

Q. What two pretty screen actresses were born in Australia?
A. Enid Bennett and Sylvia Breamer.

Q. Did Mrs. Roscoe Arbuckle ever appear on the screen? What was her maiden name?
A. In many of Fatty's comedies she appeared as his sweetheart. She was formerly Mabel Durfee.

Q. How are actors made to walk on ceilings head down? This will be explained in this column in our next issue.

Don't Blame "Spring Fever"
For That "Down-and-out" Feeling
Your Blood Needs a Thorough Cleaning Just Now.

As Spring approaches the impurities that have been accumulating in the system throughout the winter begin to clog up the circulation, causing a general weakness and debilitated condition that is generally known as "Spring fever."

The first symptoms are usually a loss of appetite, followed by a gradually lessening of energy, the system becomes weaker day by day, until you feel yourself on the verge of a breakdown. Children just at this season are peevish and irritable, and become puffy and listless.

This whole condition is but the result of impurities in the blood that

have been accumulating and make themselves felt more distinctly with the change of seasons. They show that nature needs assistance in giving the system a general housecleaning.

Everybody just now needs a few bottles of S. S. S., the great vegetable blood purifier, to cleanse it of impurities. It is good for the children, for it gives them new strength and purifies their system in addition so they can more easily resist the many ailments so prevalent in summer. S. S. S. is without an equal as a general tonic and system builder. It improves the appetite and gives new strength and vitality to both old and young.
